

CREATION OF THE APP « VAXINCORP »

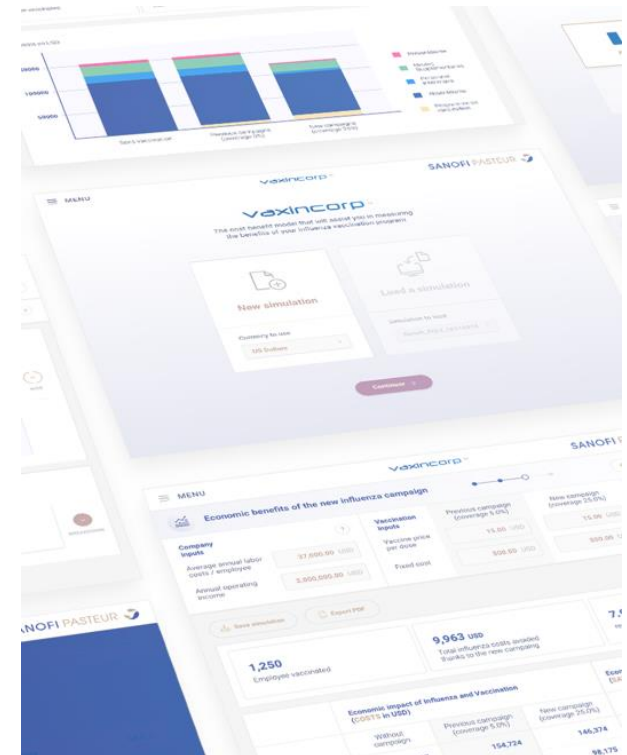

➤ CONTEXT & CHALLENGES

Every year, Sanofi prevents influenza epidemics through vaccination campaigns aimed at companies, intended to limit the impacts linked to the contamination of the influenza virus. The overhaul of their tablet simulation application, crucial in this prevention process, had become necessary. Asked for this project, SQLI chose the Flutter framework to meet the needs of this cross-platform application.

➤ PROFIT & ROI

- Clearly improved application in terms of usability and professionalism
- Maintaining operational continuity
- Improved user adoption

SANOFI - SANOFI - VAXINCORP

➤ SERVICE PROVIDED
