

The **SPLUNK** offer is a **Big Data** offer exploiting machine data (logs) in real-time and responding to many use cases: **real-time visualization of business processes**, **reduction of investigation times** (troubleshooting) on **infrastructures**, **applications** and **inter-applications flow...**

## Services and Expertise

- **Advice and guidance** on the coast saving approach through monitoring, from infra to AI
- Solution expertise, from the definition of the **architecture** to the development of real-time dashboards
- A **service and expertise center** based in Toulouse, with a relay in Malaga.
- Training

## Splunk key numbers

- 1 board of **25 people** operating in agile mode
- **30 projets**
- **3 years of expertise**

splunk®

**AIRBUS**

## Via Splunk we have :

- **Reduce** intervention time on **critical** applications, or even anticipate the incidents thanks to **prediction** algorithms
- **Increased the support efficiency**, and reduce the necessary FTEs
- Ensured the performance of critical applications
- Gave a real-time view of the business (where is my invoice?)
- **Optimized** real-time license management
- **Controlled the Cloud coast**
