

# CGI Hydrogen Vision

CGI is committed to accelerating the energy transition as digitalization partner for the hydrogen economy based on our deep expertise in energy market liberalization, renewables management, asset data management and license to operate.

## Iberdrola - Spain

CGI has implemented a complete solution that monitors the entire hydrogen production process of the largest green hydrogen generation plant in Europe for industrial use installed by Iberdrola in Spain.

- **Increased availability**
- **Increased efficiency**

## CGI AGILE DX-Hydrogen

CGI AgileDX-Hydrogen is a data exchange platform that enables seamless data sharing and communication among all stakeholders within hydrogen ecosystems. It promotes full transparency and auditability to help make insight-led business decisions and creates an open hydrogen market.

- **key stakeholders can monitor the progress of projects**
- **Highly configurable and adaptable**

## OGE - Germany

OGE, Germany's largest gas operator is pursuing plans to build a kilometer-long hydrogen network.

On declarations release to the press on 2020, OGE admitted they were able to mix up to 2% of hydrogen in their gas pipelines with the aim to reach 100% H<sup>2</sup> directly on certain lines.

CGI is partnering OGE on this journey. The project is still on going so no further details are disclosable.
