THE NEXT GENERATION OF
INTERACTIVE SOLUTION
AT YOUR SERVICE.

Enhance interactions

Follow or precede your customer, discuss while letting the robot pave the way in full security. Go meet your customers remotely or make them interact with the environment while displaying content on the gorgeous dual 27 inch touch screen.

New era of digital signage

Introduce an effective organization with this perfect autonomous mobile partner. Our robot lasts over time limiting staff turnover rate and absenteeism. The robot ensures a 24/7 constant activity on the field, and frees up staff for tasks with higher added values.

Open your imagination

100% of the application CPU, is for you to install your assets. Peak the OS of your choice, even MacOS. From hi-end interactive content to web browsing, off line or real-time connected. There is no limit to what WYCA's solution can allow you to achieve. The possibilities are endless. You can even add features to the robot such as a Scanner or a Printer.

Perfect telepresence

Engage your audience with teleconf software such as Teams, Zoom or your preferred video conference program and let the robot move you to destination without requiring any of your precious attention. Follow peoples using the remote control operations in total security. Discuss while presenting content on one of the 2 widescreens. Get people to interact with a share screen with the application of your choice with the OS of your choice.

Teleport field maintenance or sales representative

Control all the security, interest from thousands of miles away with a maintenance problem, directly on the field. Use a remote sales rep to interact with a customer, presenting interactive documents while engaging in real-time video to achieve a good sell.

A lifetime guarantee

Our robot is offered with a lifetime warranty extension. We are committed to intervene at the slightest failure and replace defective parts.
