Autonomous solutions ready today

EasyMile provides **software** and **complete solutions** for driverless mobility and goods transportation.

We partner with blue-chip manufacturers to **automate** their vehicles. Our technology is built on **safety-by-design** and **ready for deployment today** with clear client benefits.

Growing vehicle portfolio

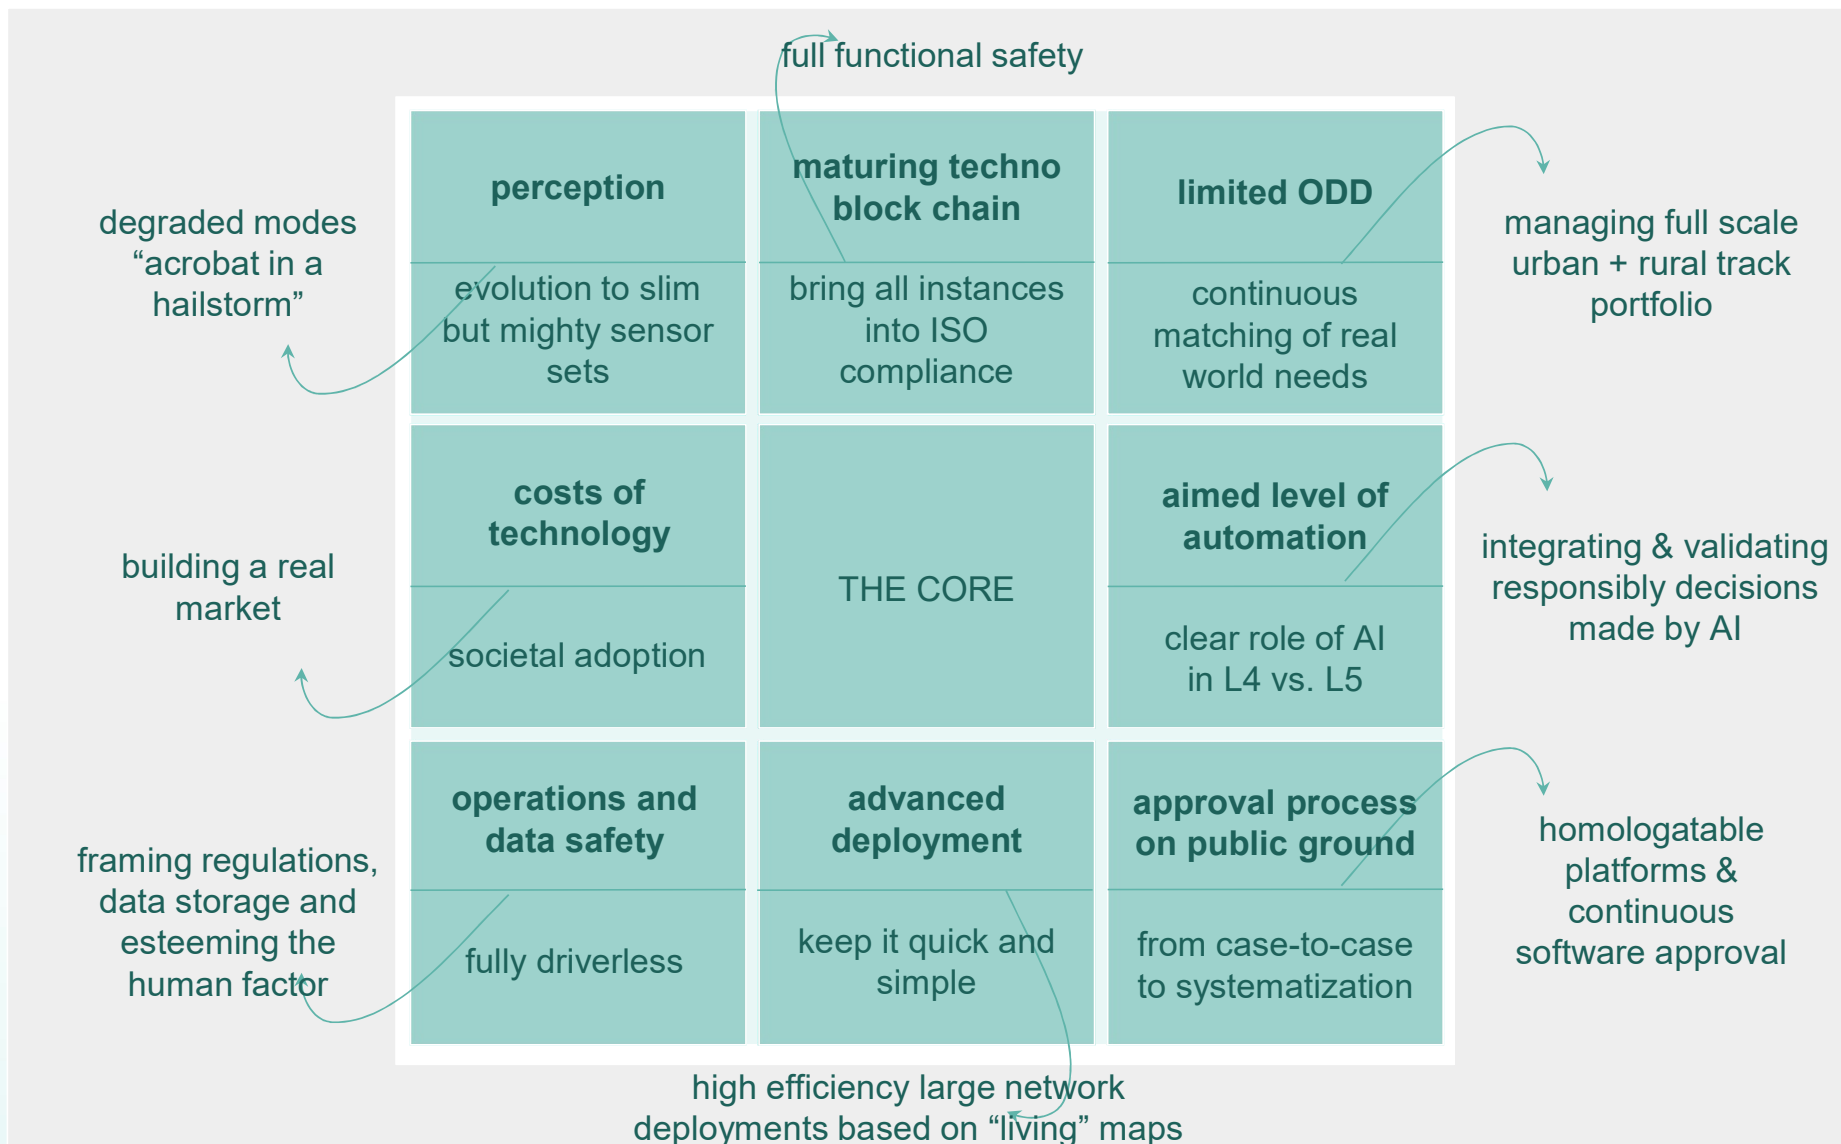

Material handling

Passenger transport

The Edge

“For to demonstrate technological advantageness and leverage large scale adoption of autonomous driving technology, we continuously need to be aware, control and work down the edge.”
